GLE
Facilities and Environmental
Consultants

**We are an experienced
provider for healthcare
facility needs.**

CLIENT SUCCESS SINCE 1989

Focused on your success.

Healthcare providers face complex challenges in order to achieve high-quality patient care, state of the art facilities and cutting-edge medical advances, all while controlling operational costs. The Healthcare industry is a dynamic and continually changing environment and facilities must have the flexibility needed to meet current regulations as well as the unpredictable demands of the future.

Since 1989, GLE Associates, Inc., has provided the Healthcare industry, with facilities and environmental consulting services. Numerous Healthcare clients have trusted us to guide them in the evaluation, design and construction of their buildings and development of their properties. GLE provides innovative solutions to the most complex issues.

GLE has established solid relationships with numerous Healthcare providers by understanding both the technical requirements of their facilities as well as their business concerns. Project schedules must be on time and budgets must be met.

We work with each Healthcare provider on an individual basis to minimize disturbance to staff and patients and most importantly maintain a 24/7 functional environment. Healthcare facilities must remain in operation at all times, especially during and after natural disasters. Our diverse team structure is designed to ensure immediate response. Our employees are available to work outside of the peak hours of facility operations, allowing for smooth and seamless project execution.

With GLE's extensive line of in-house services, we can serve as your single source provider or participate as part of your project team. This approach has saved our Healthcare clients valuable time and money. When we work at your facility we understand the whole picture and have the ability to address all of the issues that often arise during a project.

Our approach for design and developing solutions to facility related issues in the Healthcare industry is based upon our ability to advance and adapt to change. We keep our clients needs and future of the facility in mind. Not all patients require the same treatment, neither do all facilities. We understand the varying needs of this ever changing industry. We believe in keeping our clients focused on healthcare, while we focus on your properties and building needs. At GLE we are truly ***focused on your success.***
