

A complete line of professional services

Since 1989, thousands of clients have trusted us to guide them in the evaluation, design and construction of buildings and properties. With our extensive line of in-house services, we can be your single-source provider or participate as part of your project team.

Environmental Services

Use GLE as your single-source provider of comprehensive environmental services. You can depend on us for rapid response and the 24/7 support you need to put your mind at ease.

Building Sciences and Remediation Services

GLE is a leading expert in building sciences, helping clients solve challenging issues with asbestos, indoor air quality, mold, lead-based paint and radon.

- Facility surveys and inspections
- Laboratory analyses
- Operations and maintenance plans
- Risk management/hazard assessment
- Training
- Abatement design and project management
- Turnkey abatement

Site Environmental Assessment and Remediation Services

We have extensive experience addressing site environmental issues of any size or complexity, including hazardous wastes, soil, groundwater, wastewater, and underground storage tanks.

- Environmental due diligence
- Contamination assessments
- Environmental engineering
- Remediation design
- Turnkey remediation and construction
- Operations and maintenance

The experience to understand your vision. The flexibility to meet your needs.

At GLE, we're focused on your success...whether you're a commercial developer seeking to maximize the value of your property, an insurer who needs rapid assessment of claims, a lender looking for 24/7 technical support, or a facilities director seeking a cost-effective solution you can implement *now*.

For architecture and engineering design, consulting and environmental services, GLE offers exceptional innovation, creativity and expertise. Just as important, our flexibility and responsiveness truly set us apart.

Our professional team structure enables us to tailor services to your specific needs and respond rapidly at all times. We have the depth of experience to understand your objectives, and our goal is to build a lasting relationship that demonstrates we are truly your partner, dedicated to making your vision a reality.

An OSHA violation inspection created an urgent requirement to evaluate and implement new health and safety procedures in the manufacturing plant. GLE immediately mobilized a professional team to evaluate a wide range of workplace hazards and develop solutions that could be implemented quickly. When OSHA reviewed the evaluation, they requested that we allow them to use it as an example of "best industry practice."

Mike Wargo, Director
MD Building Products

Architecture and Site Design Services

- Architecture
- Master planning
- Land planning
- Space planning
- LEED consulting

Organizations know that when they work with GLE, the result will be a design that is both aesthetically pleasing and practical. We specialize in highly creative, functional design solutions.

Engineering Services

- Mechanical engineering
- Electrical engineering
- Civil engineering

Our engineers combine expertise and business acumen to deliver solid, constructible solutions that maximize the value of your property while minimizing your long-term operations and maintenance costs.

Building Assessment Services

- Property condition assessments
- ADA surveys
- Forensic A&E
- Roof consulting

With GLE, you have a single partner who can evaluate your buildings and properties, identify issues of potential concern, and develop cost-effective solutions that can be implemented immediately.

Catastrophe and Insurance Services

- Cause and origin investigations
- Wind and water loss evaluations
- Fire damage and loss assessments

In the aftermath of catastrophes and other disasters, you can depend on GLE to quickly mobilize personnel and equipment to the field, and maintain communications in any environment.

Occupational Health and Safety Services

- Industrial hygiene
- OSHA compliance
- Health and safety training

Unlike most health and safety consulting firms that can only assess the problem, our multidisciplinary teams also design and implement effective solutions, and provide training.

Construction Management Services

- Owner's representative services
- Plan and cost reviews
- Construction inspections
- Construction funds control
- Program management
- Construction management for a fee

With GLE, you have an expert team, acting as your eyes and ears to guarantee that all project objectives are met. For clients who need help implementing a multi-building construction program, GLE offers program management services to direct all planning, design and construction activities.

GLE's construction funds control program provides a proactive construction risk management solution. We track, control and disburse funds directly to those supplying materials or services on the project.

CLIENT SUCCESS SINCE 1989

When asbestos contamination was encountered during the restoration of the Ca'D'Zan at the Ringling Museum, the State called on GLE to solve the problem. Since the furniture and finishes were irreplaceable, GLE had to develop specialized cleaning procedures to remove the contamination without damage. GLE worked with the museum and the contractors to successfully restore this historic structure.
