

# Industrial Hygiene Consulting Services

**Protect your workers health and safety...  
with a well-documented IH Program.**

GLE offers the expertise of a team of industrial hygiene and occupational health and safety consultants to help clients develop and implement a thorough, cost-effective industrial hygiene program that meets all EPA, OSHA and other related regulations. GLE conducts comprehensive sampling and analysis for a broad range of airborne contaminants, including metals, organics, silica, toxic gases and vapors, particulates, asbestos and other fibers, dust, acids and welding fumes. GLE's in-house analysis of workplace contaminants is backed by stringent quality assurance controls. GLE's team of Certified Industrial Hygienists, Certified Indoor Environmental Consultants, scientists and professional engineers are also experienced in monitoring and assessing worker exposures to physical agents, including noise, ionizing and non-ionizing radiation and heat stress. GLE also provides consulting services in testing, sampling, analysis, risk assessment and ergonomics.

GLE's industrial hygiene and occupational health and safety specialists remain at the forefront of regulatory and technical developments, enabling us to develop innovative approaches to meet each client's industrial hygiene and occupational health and safety compliance needs. Our staff is available to provide technical assistance to your safety and health staff in chemical safety, air sampling, analytical techniques and other industrial hygiene issues and we have extensive experience with public relations including presentations to the media, specifically employees, senior management and regulatory agencies.
